HOSTED BY

We have heard from many of you and our community leaders about the growing concern around fraud and identity theft in our community. Please join us for an evening with **FBI Special Agent, Ethan Via** as he discusses:

- How common aging frauds are committed
- How to quickly recognize them
- What steps you can take to prevent the unthinkable from happening
- What to do if you are targeted

With 95% of aging adults being targeted, and 1 in 5 falling victim to aging fraud*, you will walk away with information from the FBI on how to protect yourself and your loved ones from aging fraud.
